## Employment History

---

### Technical Consultant & Developer

*Huge | Hero Digital*

Nov 2021 – Present

*Chicago, IL*

- Lead end-to-end Salsify PIM implementations for enterprise clients, managing discovery, requirements gathering, solution architecture, and full system buildout.
- Author all functional documentation, user stories, and acceptance criteria; drive client UAT by writing test cases, facilitating testing sessions, and supporting deployment.
- Co-developed and maintained a custom Salsify to Adobe Commerce Cloud (Magento 2) connector, including porting the system to Express/Node.js and contributing key feature enhancements.
- Serve as the company's Salsify subject matter expert—holding all seven certifications, creating onboarding materials, and supporting pre-sales by scoping and demoing solutions to prospects.

### React Native Developer

*Gesture*

May 2021 – Aug 2020

*New York, NY*

Software Engineer Level 2

- Migrating native IOS mobile application to react native with new feature implementations.
- Leading implementation of redux architecture.

Software Engineer Level 1

- Mentor for new interns and employees for frontend engineering.
- Created two documents for proper code review process and frontend architecture.

### Software Engineer Intern

*Smart Twigs*

Nov 2020 – March 2021

*New York, NY*

- Led the research and implementation of a metric tracking tool in the company's iOS app after one month of experience at the company, resulting in user interface improvement.
- Helped onboard five employees and lead development of key deliverables and components.
- Implemented a new component that allows developers to analyze performance issues within the application.
